If you are advising an Env. Studies major or potential Env. Studies major this season, the following courses are offered in Fall 2025 that count toward the major.

BIO-155/-155L Organismal and Ecological Biology and Lab
CHM-121/-121L General Chemistry 1 and Lab
ECO- Principles of Macroeconomics
ECO - Principles of Microeconomics
POL-115 American National Government and Politics
POL-210 Environmental Politics
SOC-326 Gender and Globalization

POL-210 can count toward requirement 5 or 8b below, and SOC-326 toward requirement 8b.

In Spring 2026, PHL-205 Environmental Philosophy and BIO-111 Urban Ecology will be offered and should be taken by majors if possible.

Below is a Catalog Copy version of the courses that are currently available and accepted in the major. Note that this is **NOT** official copy, but the Program Coordinator will make substitutions in line with the language below. It reflects the current courses that are available at the College.

Collateral Major in Environmental Studies
A major in environmental studies requires a minimum cumulative 2.0 GPA in all courses counted toward the major.
Concurrent completion of any of the majors listed in the Catalog is required.

1. BIO-105 Introduction to Environmental Studies
2. <u>One</u> of the following:
   BIO-155/-155L Organismal and Ecological Biology and Laboratory (WE)
   BIO 111/-111L Urban Ecology and Laboratory
3. ECO-175 Principles of Macroeconomics
4. ECO-195 Principles of Environmental Economics
5. <u>One</u> of the following:
   POL-107 Environmental Justice (**NOTE**: *Taught at the Wilderness Field Station*)
   POL-210 Environmental Politics
   PHL-205 Environmental Ethics (WE)
6. <u>One</u> of the following:
   BUS-190 Statistical Analysis (WE)
   BUS-340 Applied Regression Analysis
   PSY-300 Statistical Methods and Data Analysis
   SOC-235 Methods of Sociological Research (WE)
   STA-100 Statistical Foundations (7 weeks) **and** STA-110 Inferential Statistics (7 weeks)
   STA-100 Statistical Foundations (7 weeks) **and** STA-130 Experimental Design (7 weeks)
   STA-315 Mathematical Probability
7. EVS-484 Topics in Environmental Studies
8. <u>Four</u> courses to be chosen as indicated from the four sections below. Courses with a substantial focus on environmental content and relevant to a student's particular course of study may be substituted to fulfill this category, subject to prior approval by the Environmental Studies administrative coordinator.
   a. <u>One or more</u> of the following <u>Natural Science</u> courses, at least one of which must be listed as an

Experimental Learning course in the Natural Science Inquiry section of the General Education Distribution Courses or have a listed lab section:
BIO-111/-111L Urban Ecology and Laboratory (if not used to satisfy # 2)
BIO-115 Marine Biology (**NOTE***: Offered May Term*)
BIO-165/-165L Ecology and Biology of Birds and Lab
BIO-185/-185L Entomology and Laboratory (**NOTE**: *Taught at the Wilderness Field Station*)
BIO-285/-285L Animal Behavior and Laboratory (**NOTE**: *Taught at the Wilderness Field Station*)
PHY-161 Energy: Science and Technology
PHY-311 Renewable Energy (WE)
CHM-103/-103L Selected Concepts in Chemistry **or** CHM-121/-121L General Chemistry I and Laboratory
CHM-211/-211L Analytical Chemistry and Lab

b. One or more of the following Social Science courses:
POL-107 Environmental Justice (if not used to satisfy #5; **NOTE**: *Taught at the Wilderness Field Station*)
POL-115 American National Government and Politics
POL-210 Environmental Politics (WE) (if not used to satisfy #5)
SOC-226 Gender and Globalization

c. One or more of the following Humanities courses:
PHL-205 Environmental Ethics (WE) (if not used to satisfy #5)
RHE-257 Environmental Rhetoric (WE)
RHE-345 Writing Wilderness (WE) (**NOTE:** *Taught at the Wilderness Field Station*)

d. Alternatively, one class from the following list and one from each of the above lists (a,b, and c) may be used:
Any class with prefix DS (Data Science)

COURSES IN ENVIRONMENTAL STUDIES (COLLATERAL MAJOR)

ECO-195 Principles of Environmental Economics
An introduction to the economics of the environment and natural resource allocation. This course is focused on optimal resource allocation and the problems associated with externalities and public goods in the context of a market economy. Environmental issues and policy are analyzed using standard economic models. This course may be used to satisfy the requirements for a major in Environmental Studies but does not satisfy any of the requirements for a major or minor in economics. Prerequisite: Principles of Macroeconomics (ECO-175).

EVS-484 Topics in Environmental Studies
An intensive examination of selected works and subjects dealing with environmental issues. Specific topics vary from year to year. Prerequisite: junior standing or permission of instructor. May be taken more than once for credit with permission of instructor.
